Pharmacy & Therapeutics / Medication Safety Committee	Required	12 months
Teaching and Learning Experience Oregon Pharmacy Teaching Certificate (OPTC)¹	Required	12 months
Residency Project²	Required	12 months
Pharmacy Staffing³	Required	10 months

¹ Oregon Pharmacy Teaching Certificate (OPTC) program: This program is jointly operated by the Oregon State University College of Pharmacy and Pacific University School of Pharmacy. It is intended for postgraduate pharmacy trainees who are interested in didactic and experiential education activities and includes workshops, practical training and hands on teaching experiences. Residents that successfully complete all required teaching activities will be awarded a teaching certificate.

² Residency Project: Each resident completes a year-long project during the residency year. Potential projects are identified by the Residency Advisory Committee and presented to the residents for consideration and ranking early in the year. Residents participate in all stages of the process including developing a time line, obtaining IRB approval, data collection and analysis, submitting an abstract for presentation of the project at the Northwestern States Conference for Residents and Preceptors and a poster for ASHP Midyear, and completing a manuscript.

³ Pharmacy Staffing Commitment: Service commitment is crucial to the development of professional practice skills. Residents will gain proficiency in both operational and clinical skill sets during the staffing experience, which includes exposure to both central and decentral pharmacy practice. This exposure will provide valuable experience and insights into key inpatient pharmacy processes for acute care facilities, increasing one's ability to lead practice improvement initiatives. Residents are expected to staff approximately 32 hours per month, 8 hours per staffing shift.
